

POLICY FOR USE OF SCHOOL FACILITIES

The Board of Education recognizes that district facilities belong to the school community. Therefore, it is the policy of the Board to encourage the use of the facilities by established local groups and organizations whose purpose and objectives contribute to the school program or to the community.

The Board also recognizes that the primary purpose of the district's facilities is to implement the instructional program of the District. The Board further recognizes that there are costs involved in non-school use of facilities and that charges should be made so that taxpayer funds are not used in support of non-school activities.

The Superintendent/Designee shall develop a fee schedule and regulations governing the use and rental of district facilities to protect the regular instructional program, those who use the facilities, and the taxpayers who have provided the facilities. These regulations shall define those groups permitted to use district facilities as well as the specific limitations and prohibited activities in school facilities. No person or organization shall be granted permission to use district facilities who has not agreed in writing to be bound by the regulations of the District.

In case of disaster or emergencies in the area of this School District or in nearby areas, the Superintendent may open district facilities and sites to assist civil authorities in the relief of human misery and the saving of life.

FACILITY USE

The following regulation governs the use and rental of school facilities, outdoor grounds and stadiums, and was developed in order to: protect the regular instructional program, those who use the facilities, and the taxpayer that has provided the facilities.
